Amendments to the Claim

12-15-04

The following listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

What we claim as our invention is:

- 1. (currently amended) A portable utility stand comprising:
- a base frame member comprised of a longitudinal member with substantially orthogonal longitudinal members at each end with footpads extending downwardly from the orthogonal longitudinal members and a plurality of user equipment mounting means extending upmently from the base;
 - a seat and backrest member wherein the seat member includes a storage compartment comprising a slidsbly mounted drawer and storage compartment including a means for slidsbly mounting said seat and backrest to said base frame member;
 - a slidably and pivotably mounted work/reference platform pivotably mounted to said base frame member:
 - a pivotably mounted equipment support structure uniquely configured to hold user specific equipment mounted to said base frame member;
 - a flexible gooseneck equipment support member pivotably mounted to said base frame member;
 - a phrality of footrest platforms adjustably mounted to said base frame member;
 - a plurality of reference tables pivotably mounted to said base frame member;
 - a extension arm member pivotably mounted to said base frame member and pivotably supporting said equipment support structure;

a umbrella whereby the user and his equipment is protected from the elements is mounted to the said base frame using a pharality of the said base frame user equipment mounting means.

(original) The portable utility stand of claim 1 wherein:

the portable utility stand is collapsible by removing the equipment from the user equipment mountingmeans of said base frame member and storing substantially horizontal in close proximity to said base frame member.

3. (currently amended) The portable utility stand of claim 1 wherein:

the base frame-equipment mounting means of said base frame are configured to cooperate with all of the mounting stalks of said user equipment providing the user the ability to arrange the equipment on the said base frame to suit personal preference.

4. (original) The portable utility stand of claim 1 wherein:

the said base frame member is composed of three members; a horizontal center member that supports the said sent and footrest equipment mounting means; substantially perpendicular log members at each end of the said center member supported by mounting feet at the extreme ends of the perpendicular leg members, providing an enlarged bearing surface for supporting said portable utility stand.

5. (original) The portable utility stand of claim 1 wherein:

the seat is slidably adjustable for height and the seat back is pivotably adjusted for tilt.

(currently amended) The portable utility stand of claim 1 wherein:

the work/reference platform is illuminated with a phurality of battery powered LED sources mounted to the work/reference platform.

7. (currently amended) The portable utility stand of claim I wherein:

a compact version of a portable utility stand comprising a three point supported platform having a means for pivotally collapsing the work surface such that it is stowed below the seat.
